17α -Hydroxypregnenolone: A novel and useful progestogen for women's health. 17α -Hydroxypregnenolone (17-OHP-PROG) is a novel synthetic progestogen that is under development for contraceptive and gynecological indications and represents a further step in the evolution of progestogen therapy. It has a human progestogenic activity profile that differs significantly from progesterone and offers the potential to alleviate the progestogenic side effects associated with some of the existing progestogens (e.g. administration-associated breakthrough bleeding and the need for daily dosing). In addition, the profile of 17-OHP-PROG has the potential to markedly reduce adverse estrogenic effects on several circulating lipoprotein fractions, i.e. levels of total cholesterol, low-density lipoprotein cholesterol, triglycerides, and high-density lipoprotein cholesterol and enhances estradiol-induced increase in HDL cholesterol. The efficacy of 17-OHP-PROG has been established in a controlled phase III study in which the progestogenic effect was superior to levonorgestrel and within an acceptable range of mean values for progestogen-induced withdrawal bleeding. The safety of this progestogen has been demonstrated in a large phase III study conducted in

Be the first to review this product!Q: How should I start learning about D3.js if I haven't been using Javascript before? I am a big fan of the sounds of D3.js as a way to create visualisations. However, I have never used Javascript at all, and probably would struggle to come up with an interesting visualisation even if I had. Does anyone here know of a good place to start, or books that are worth reading? A: As other answers have pointed out, D3 is pretty easy to pick up if you are already familiar with Javascript, and have a jQuery/Canvas background. If you are the sort of person who has never used Javascript before (and I don't blame you), here are a few sites I found useful: A: If you're finding it hard to get started, I'd suggest you take a quick look at D3.js through the "Getting Started" tutorials on the d3.js homepage. Once you've a grasp of what D3 is and how it works, I suggest you break out into different areas of Javascript and focus on just one area at a time. For example, look at the "Basic" tutorials, once you
